DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1, 9-11, and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cavaness et al in view of Beeuwsaert and Foss, Jr.

Cavaness discloses the use of a stringed musical acoustic device having a soundboard made of polycarbonate (column 2, lines 38-40).

Cavaness does not disclose the specific use of expanded polycarbonate.

Beeuwsaert disclosed the use of a covering device made from expanded polycarbonate (column 3, lines 40-45).

Cavaness et al and Beeuwsaert do not disclose the use of a polycarbonate sheet.

Foss, Jr. discloses the use of a musical instrument comprising a polycarbonate sheet (column 2, line 40-45).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the device as disclosed by Cavaness et al with the expanded polycarbonate as taught by Beeuwsaert and the polycarbonate sheet as taught by Foss, Jr. in order to provide a rigid musical instrument body because Cavaness discloses that the use of polycarbonate is well known in the art and Foss discloses that these materials provide rigid support to musical instrument bodies.

3. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cavaness et al in view of Beeuwsaert and Cove.

Cavaness and Beeuwsaert do not disclose the use of a guitar body made of rigid foam.

Cove discloses the use a guitar body made of rigid foam.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the device as disclosed by Cavaness et al with the expanded polycarbonate as taught by Beeuwsaert and the foam as taught by Cove in order to protect the body of the instrument.

4. Claims 4-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Applicant's arguments with respect to claims 1, 3, 9-11, and 2 have been considered but are moot in view of the new ground of rejection. However, it is noted that the features upon which applicant relies (i.e., the primary function, etc.) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the

prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992).

6. Any inquiry of a **general nature or relating to the status of this application or filed papers** should be directed to the **Group receptionist whose telephone number is (703) 308-0956**.

Papers related to this application may be submitted to Group 2800 by facsimile transmission. Papers should be faxed to Group 2800 via the PTO 2800 Fax Center located at Crystal Plaza 4. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 O.G. 30 (November 15, 1989). The Group 2800 CP 4 Fax Center number is (703) 308-77(22 or 24). Fax numbers that provide an auto-reply fax receipt are: for before finals (703) 872-9318 and after finals (703) 872-9319.

For assistance in **Patent procedure, fees or general Patent questions** calls should be directed to the **Patents Assistance Center (PAC)** whose **telephone number is 800-786-9199**. Assistance is also available on the Internet at www.uspto.gov.
